Carbon Reduction Plan 2025/2026

Redcentric Solutions Ltd

Publication Date: 02/09/2026

redcentric

Commitment to achieving Net Zero

Redcentric is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: FY2021/22
Additional Details relating to the Baseline Emissions calculations
Scopes 1 and 2, consumption and CO2e emissions data was calculated in line with the 2019 UK Government environmental reporting guidance. Emissions Factor Database 2021 version 1 was used, utilising the published kWh gross calorific value (CV) and KgCO2e emissions factors relevant for reporting period 1/4/21 to 31/3/22 Although Redcentric purchase renewable electricity for all facilities, and therefore Scope 2 emissions would be classed as zero under a market-based approach, we are using a location-based approach to allow year on year monitoring of our usage. For Scope 3 we utilised the Greenhouse Gas Protocol Corporate Value Chain accounting and Reporting Standards as a result of undertaking a thorough data collection. In total, nine (9) out of the fifteen (15) Scope 3 categories were applicable to Redcentric.

Baseline year emissions: FY2021/22	
Emissions	**Total (tCO2e)**
Scope 1	**23**
Scope 2	**4017** (location-based approach)
Scope 3 (Included Sources)	**14,737** Data sources for this total as listed below; Purchased goods and services (capital goods) Fuel-related emissions Upstream transportation and distribution Waste generated in operations Business travel Employee commuting Use of sold products End of life treatment of sold products
Total Emissions	**18,777**

Current Emissions Reporting

Baseline year emissions: FY2025/26	
Emissions	**Total (tCO2e)**
Scope 1 (included sources)	**254** Transport Other fuels and refrigerants
Scope 2 (location based)	**12,432** Grid supplied electricity
Scope 3 (Included Sources)	**14,008** 1 Purchased good and services 2 Capital goods 3 Fuel and energy related activities 4 Upstream transportation and distribution 5 Waste generated in operations 6 Business travel 7 Employee commuting 11 Use of sold products 12 End of life treatment of sold products ** Excluded categories; 8 Upstream leased assets 9 Downstream transportation and distribution 10 Processing of sold products 13 Downstream leased assets 14 Franchises 15 Investments
Total Emissions (location based)	**26,694**

There have been significant changes to Redcentric's business scale and composition since the FY22 baseline. The increase in Scope 1, 2 and 3 emissions between FY22 and FY26 can be attributed to a number of acquisitions across FY22 and FY23, particularly regarding 4D Data Centres and Sungard, that resulted in a larger data centre portfolio. More recently, Redcentric's sale of its data centres to Stellanor in Spring 2026 is expected to have an even more significant impact on its year-on-year emissions results in the FY2027 disclosure.

Due to these significant changes in operations since the baseline, Redcentric will be conducting a comprehensive review of its emissions across Scope 1, 2 and 3 for its FY2027 reporting year with support from Inspired ESG. This review will include reassessing the group's emissions reductions targets and KPIs and re-establishing a more representative baseline inventory that is reflective of Redcentric's transformed business structure.

Scope 3 Category Exclusions

The table below details the scope 3 sub-categories that are not disclosed and the justification for exclusion.

Scope 3 Sub-category	Justification for exclusion
8 Upstream leased assets	Redcentric does not lease any assets from third parties
9 Downstream transportation and distribution	Redcentric pays for all transportation and distribution services
10 Processing of sold products	Redcentric does not sell any products that require further processing
13 Downstream leased assets	Redcentric does not lease out assets to third parties
14 Franchises	Redcentric does not have franchises
15 Investments	Redcentric has no financial investments or joint ventures

% Changes for Emissions Data

	% Change between FY25 and FY26
Scope 1 Total	-18.10%
Scope 2 Total	-22.37%
Scope 3 Total	-29.89%
TOTAL	-26.47%

Scope 1 emissions have fallen by 18.10% since FY25, primarily related to emissions from refrigerants & other fuels. Emissions from refrigerant leaks saw a reduction since FY25 due to continuous site maintenance and equipment improvements while emissions from other fuels decreased following a business decision to reduce generators' running hours.

Scope 2 emissions from electricity have decreased by 22.37% in FY2026 compared to FY2025. This reduction is largely driven by energy efficiency measures implemented at the data centres, and a 14.51% decrease in the published 2025 Department for Energy Security and Net Zero (DESNZ) UK-grid electricity emission factor owing to the UK grid's continued decarbonisation efforts.

Scope 3 emissions have decreased in FY2026 compared to FY2025 largely due a reduction in emissions from purchased goods and services and capital goods.

Emissions Reduction targets

For Redcentric to reach the SBTi-aligned net zero target, a roadmap has been developed with specific near-term targets and a strategy designed to reduce emissions:

1. Net Zero (at least 90% absolute reduction) in Scope 1, Scope 2, and Scope 3 emissions by FY50, from a FY22 base year.

2. 42% absolute reduction in Scope 1 and Scope 2 emissions by FY30, from a FY22 base year.

As mentioned above, Redcentric has undergone a significant change in company structure following the sale of its data centres in Spring 2026 which will require a comprehensive review of its emissions across Scope 1, 2 and 3 to re-establish a more representative baseline inventory and a re-assessment of the group's emission reduction targets and decarbonisation pathway.

Redcentric is currently reviewing its potential emission reduction target options and decarbonisation strategies ahead of the upcoming financial year with the aim to report these within in its FY27 disclosure.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management projects have been completed;

- Closure of Harrogate Data Centre and relocation to Elland creating efficiency in energy usage
- Upgrade to more efficient UPS systems
- Consolidation of Data Centre equipment to lower overall energy consumption and emissions
- Significant investment made in metering infrastructure across all data centres, allowing monitoring usage at customer level and so driving behavioural change which is mutually beneficial in lowering costs and reducing emissions

Future Carbon Reduction Initiatives

In the future we hope to implement further measures such as:

- Enhance quality of data and checks during the collection process to improve future focussed monitoring and reporting

In Autumn 2026, we will explore new carbon reduction initiatives across Redcentric Solutions Limited, identifying options that are both relevant and practical for our business operations. This review will help us prioritise measures with the greatest potential impact on our emissions profile and build a clear roadmap for decarbonisation.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting .

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard .

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Andy Duffey
